

O2 mod – AUTOBOOT with Media Player tutorial

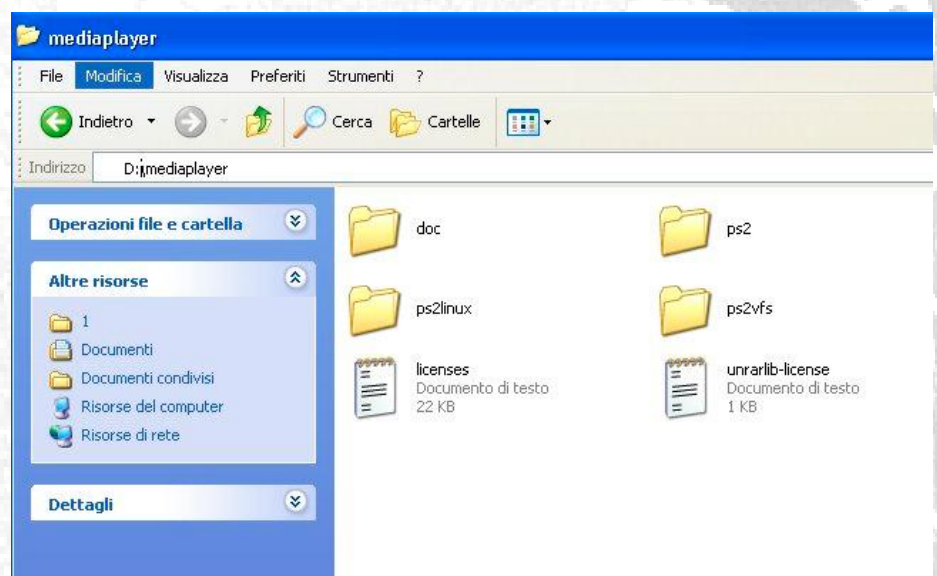

Needed Files:

- Ps2 reality player (downloadable from the website www.ps2reality.net)

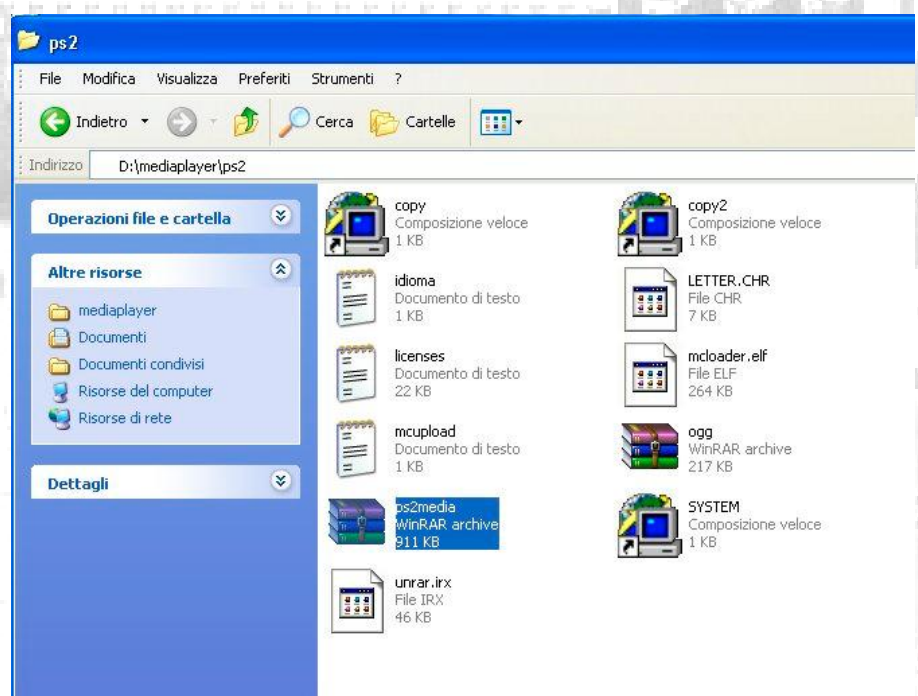

Warning: This autoboot function has been implemented from OS version 1.3, so please make sure you have installed the 1.3 O2 OS.

- Download from the above website the file in zip format.

Unpack the content of the zip file in a folder on the PC

Unpack the file “ps2media.rar” (which is in the subfolder “PS2”), into a new folder.

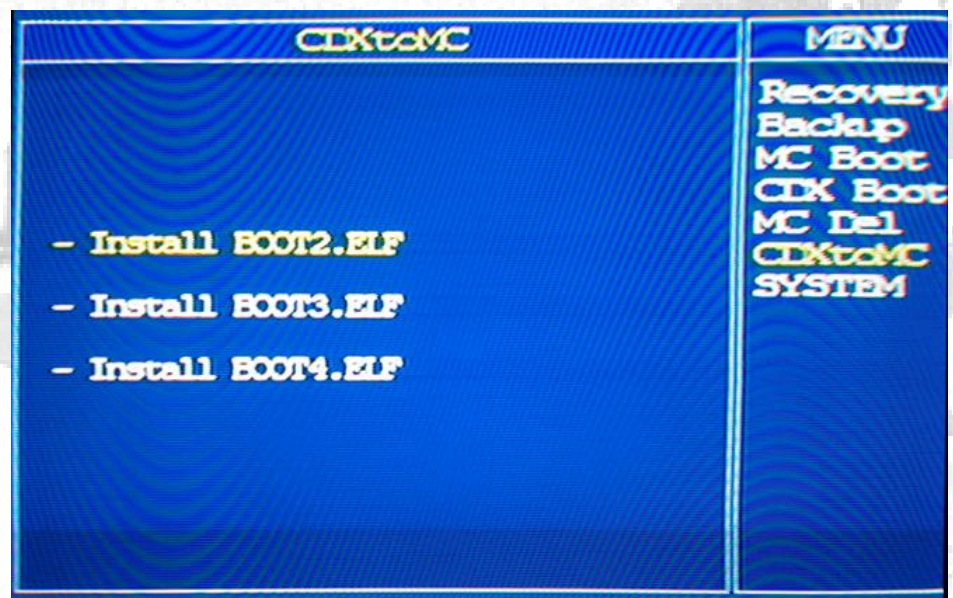

In this last folder there will be only one file : “PS2MEDIA.ELF”

- Rename the file “PS2MEDIA.ELF” into “boot2.elf”

Warning: Renaming the file to “boot2.elf”, it will be installed on the memory card in the virtual slot “MC0 MODE”, which you can activate, turning on the console while pressing and holding the button “L1”; in case you want to install the PS2REALITY PLAYER in other Memory card slots, then you will need to rename the file to “boot3.elf” o “boot4.elf”, depending on the fact if you want to install it on the Memory card virtual slots: “Mc1 mode” (which can be activated turning on the console and pressing button “R1”) or “Mc2 mode” (which can be activated turning on the console and pressing button “R2”)

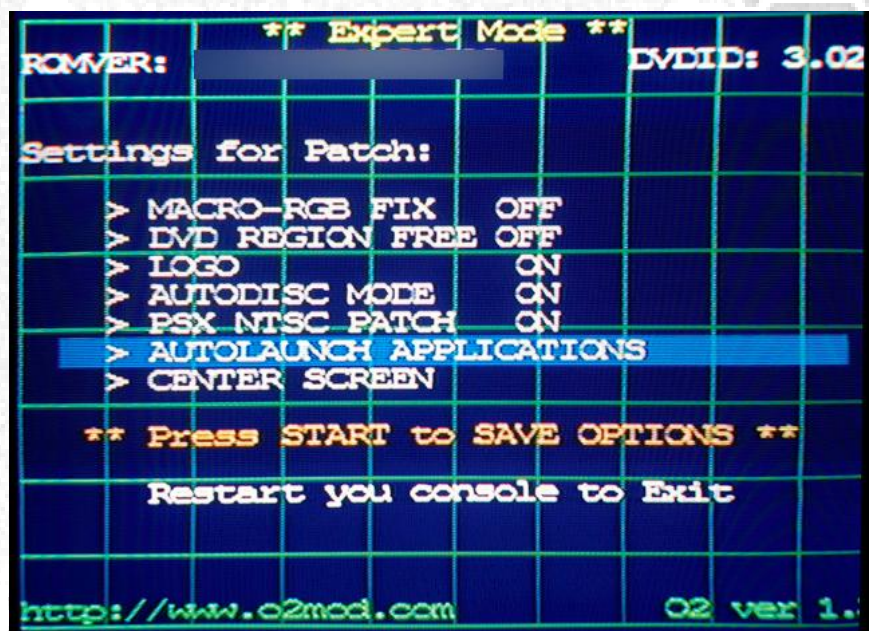

- Follow the instructions written in the tutorial “CDX Disc Creation” to write the file “PS2MEDIA.ELF” in CDX format.
- Turn on the the Ps2 in “RECOVERY” mode, pressing and holding pressed the button “EJECT”
- Insert the disc with the PS2Reality PLAYER on it in CDX format

Select with the joypad the option “CDXTOMC” and then “INSTALL BOOT2.elf”

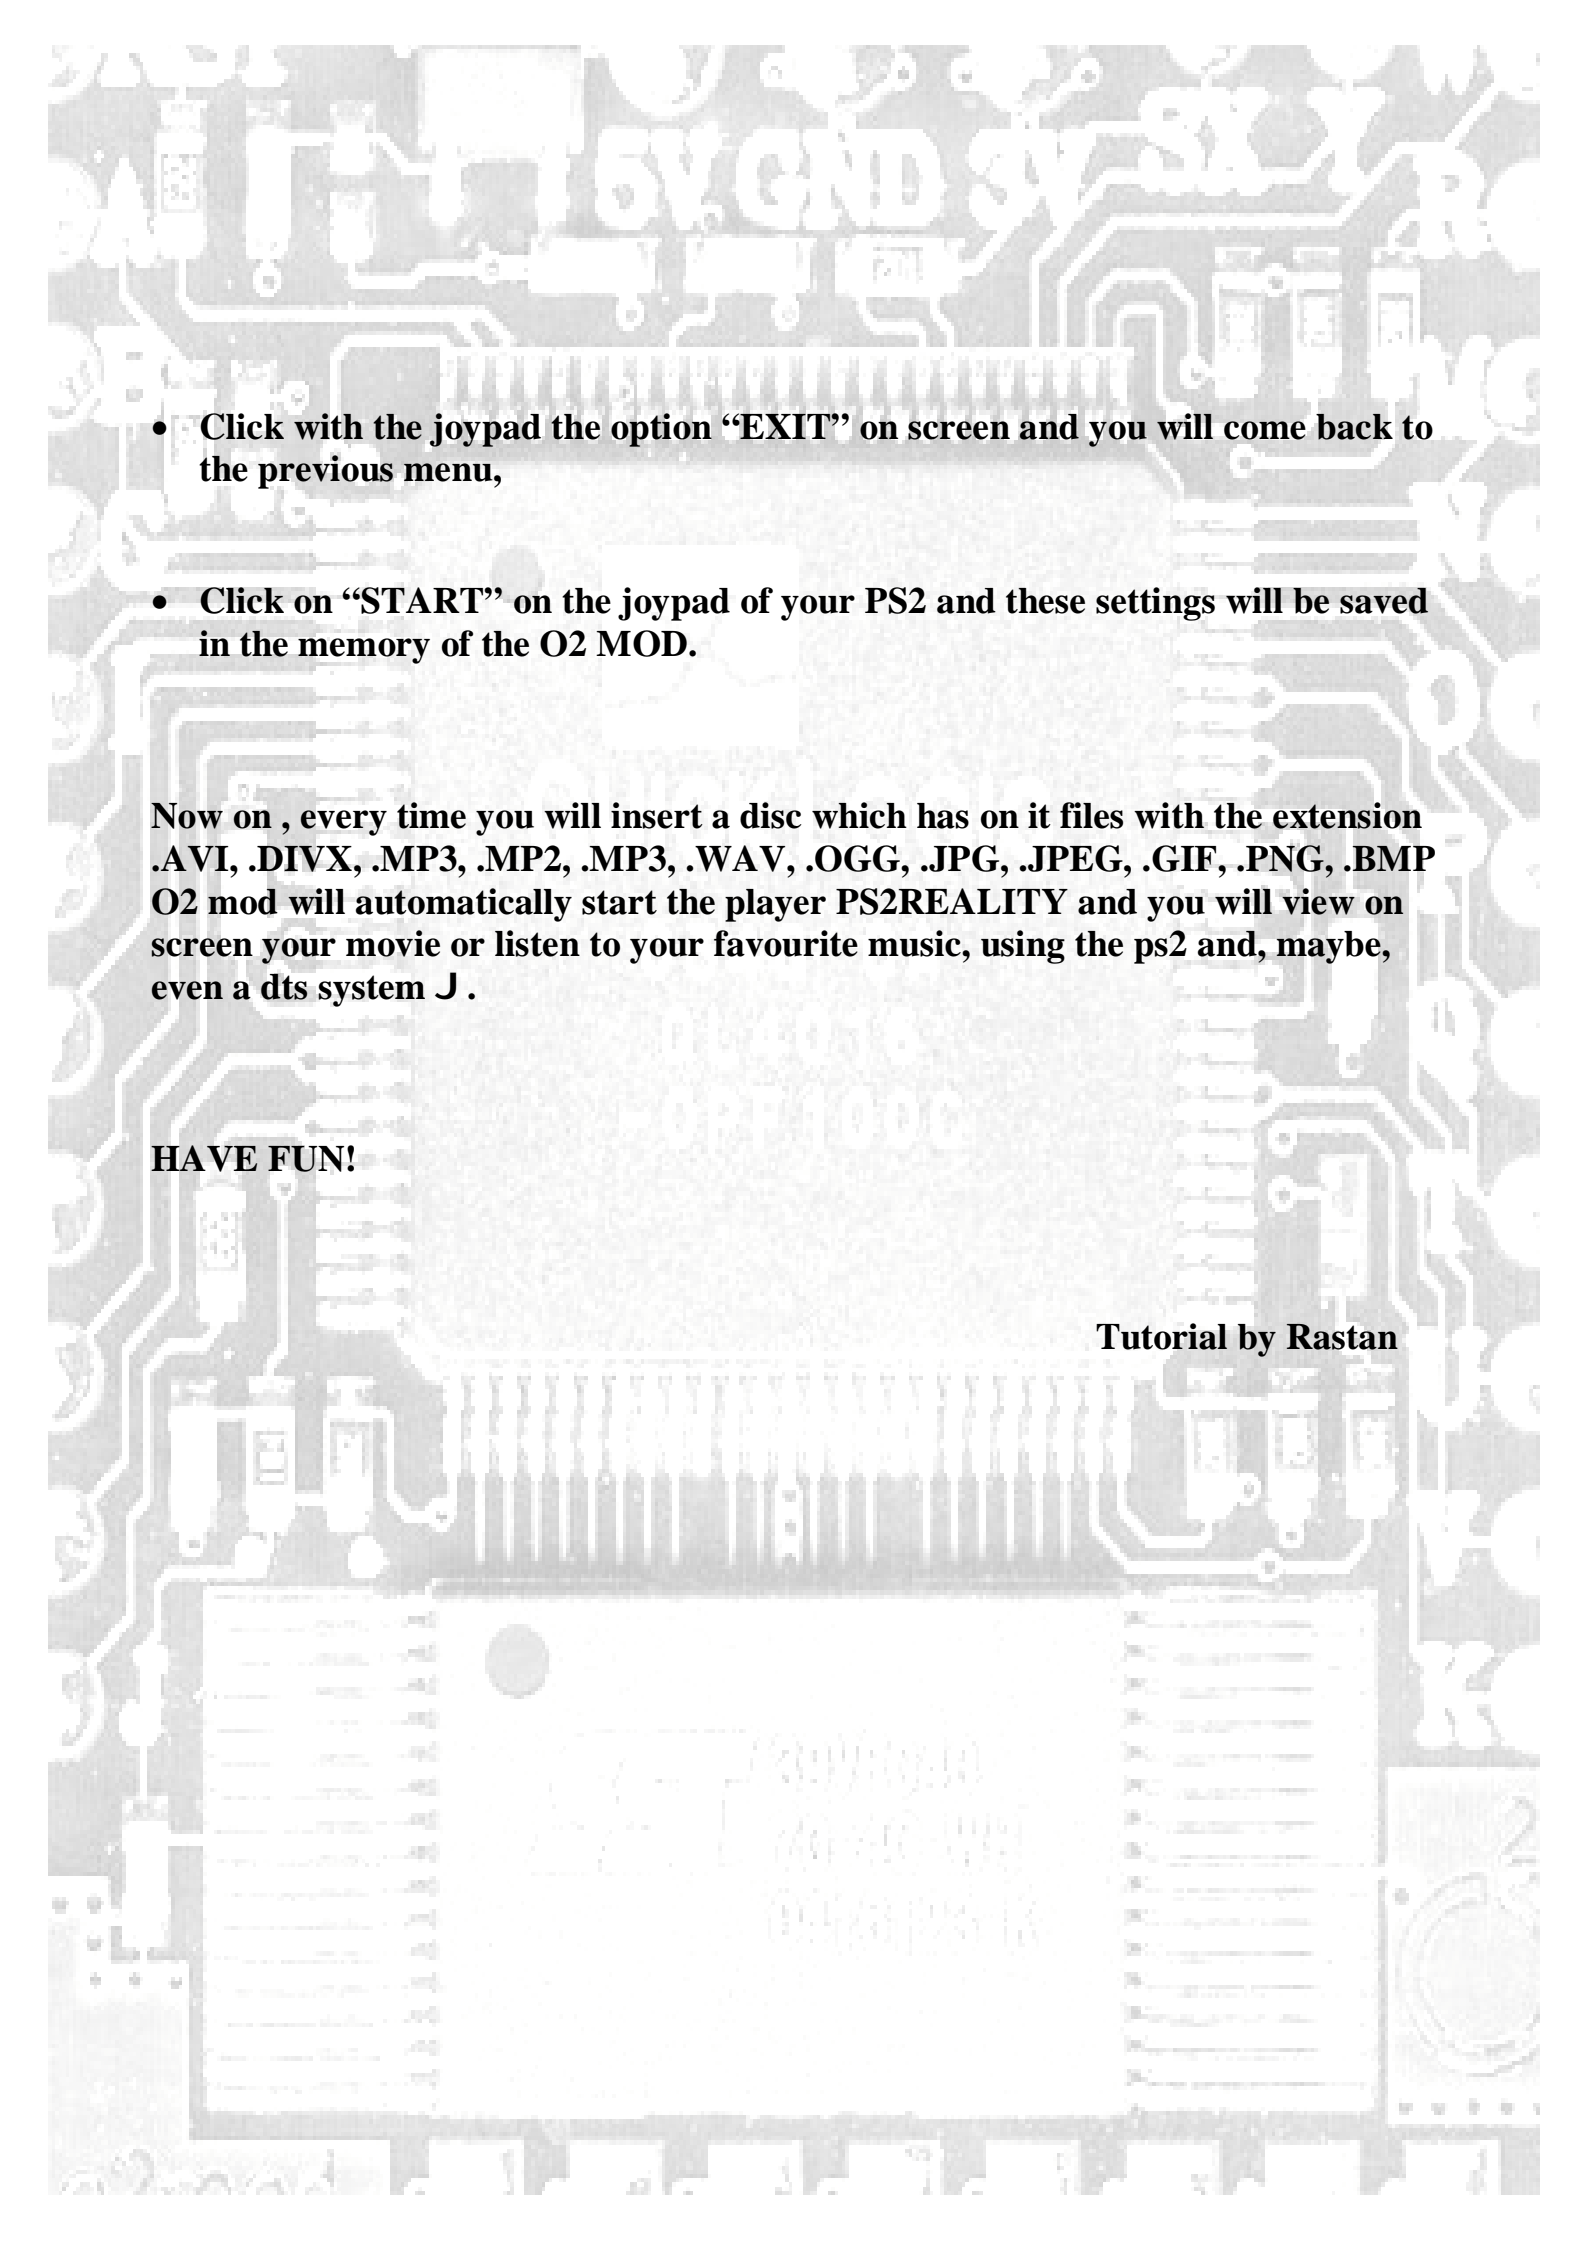

- Once the Flashing is done (after few seconds), you will see on screen the message “Operation successful”
- At this point you can turn off your PS2.
- Turn on again the PS2 pressing and holding pressed the button “Triangle” on the PS2 joystick
- It will appear the o2 mod menu “EXPERT”

Select the option
“Autolaunch
Applications”, you
will enter in a sub
Menu

Select “L1” (pressing
the button “CROSS”
on the ps2 joystick)
for the options:
“Videoplayer”
“Audioplayer”
“Imageviewer”

- 
- Click with the joypad the option “EXIT” on screen and you will come back to the previous menu,
 - Click on “START” on the joypad of your PS2 and these settings will be saved in the memory of the O2 MOD.

Now on , every time you will insert a disc which has on it files with the extension .AVI, .DIVX, .MP3, .MP2, .MP3, .WAV, .OGG, .JPG, .JPEG, .GIF, .PNG, .BMP O2 mod will automatically start the player PS2REALITY and you will view on screen your movie or listen to your favourite music, using the ps2 and, maybe, even a dts system J .

HAVE FUN!
